

HANDS ON SCIENCE

PROGRAM REQUEST FORM

These hands on science workshops are great for elementary students (grades K-6) and are designed to spark and inspire the scientist inside each of them Children work in small groups of 5– 7 students within their age group. Great adult to student ratio.

Students create a wish list of 7 activities from age appropriate workshops. The Discovery Center determines the 3 the student will do based on interest in the subject and age of students requesting a particular subject.

Students are grouped by age. Example: a Magical Science activity would be different for a 5th grader vs a kindergartener.

Fabulous magic show during lunch featuring live animals and educational facts

NO COST TO THE SCHOOL all we need is a cafeteria with tables and a few tables in the hall outside the cafeteria.

Please note while there is no cost to the school we do not pay custodial fees, in some cases the school may be responsible for custodial fees using the cafeteria on a Saturday. Often these fees are waived for educational programs.

REASONABLY PRICED PROGRAM. For just about \$40 per child paid for by the parents sending students. The student does 3 hands on science activities. Plus a magic show during lunch. Program runs on a Saturday from 10AM-2PM(snow dates for winter programs)

NO PAPERWORK—parents register directly with the Discovery Center, so no paperwork on the school level—simply copy or email the registration form to the school population and the Discovery Center does the rest. Really easy to implement.

FUNDRAISER FOR YOUR PTA – turn your science day into a fundraiser by tacking on any dollar amount above the Discovery Center pricing and the Center will give you that amount. (Example: Program is \$40 + \$3 for your fundraiser = \$43 cost to parents and we give you \$3 back per child.

GREAT HANDS ON SCIENCE SUBJECTS FOR YOUR STUDENTS TO CHOOSE FROM

please note the list is always changing, these are classes we have done over the years

VOLCANOES & MOUNTAINS	WATER EXPERIMENTS	CHEMISTRY FOR KIDS	GRAVITY	MAGICAL SCIENCE
ROCKS & MINERALS	SOUND & MUSIC	AMAZING AIR	IT'S IN THE DIG	SOLAR SYSTEM / PLANETS
ELECTRICITY & MAGNETISM	FOSSILS	IN THE OCEAN	REPTILES	STATIC ELECTRICITY
RAINBOWS & PRISMS	HURRICANES & STORMS	DINOSUARS	ROCKETRY	BIRDS, FEATHERS & EGGS
SKULLS	CRIME LAB	NSECTS	OPTICAL ILLUSIONS
