STAY SAFE REQUIRED!

1. Abide by the current COVID-19 rules for your school. Much can be done online via emails, Skype, texting and if all on the team have One Drive. We do expect that it is your work, your team's work and doesn't include others not associated with your project.

2. Please create your poster board using a Free PowerPoint Templates for Posters - Science Fair. While we are not advertising this site this is one of the places we found. http://posters4research.com/templates.php . You should choose a poster board with 3-4 columns and this should be 72 inches tall and can be 36-48 inches wide, (36 inches = 3 columns and 48 inches = 4 columns.) You will be required to turn your Poster Board into a **PDF**. You may also upload it in the original format. If choosing the latter then BOTH the pdf and original format need to be uploaded.

3. You need a 10 minute presentation using YOUTUBE. IT MUST BE "UNLISTED" so that only people with the link can see it. You can narrate this without being seen if that is your preference. You may have a PowerPoint presentation with slides these must go into a YouTube format. **If using anything from another competition you must crop out any awards you received.**

4. FREE Video Editing Sources: VSDC (Windows) iMovie (Mac) have been recommended to us although we have never used.

5. If you are a team and unable to merge two videos together made separately, please note there is an area for up to three team member videos to be placed on the entry form. Each team member should pick an aspect of the project to address. You may divide the 10 minute video into whatever combination you would like. Example one video 2 minutes another 5, 3 for the last one.

ONLINE ENTRY FORM

While all parties on a team project will receive the entry form please select one person to be in charge of getting it back to us. The person "in charge" or email entered on First Contributor line will receive a written confirmation and be able to view what we see. Please forward that to your team members.

WRITTEN RESPONSES

1. You should be able to collaborate with your partner(s) on this so that only one person is actually in charge and you have answers to the questions.

2. You have a unique opportunity to select your own question and answer it. This gives you an opportunity to question your strongest point and make it.

3. You will be allowed up to 350 words to summarize your project.

4. **All answers are final once you hit send** so we suggest that you write your answers in word or other reviewable format and then cut and paste your answers into the appropriate boxes.

VIDEO

While all parties will receive the entry form please select one person to be in charge of getting it back to us. If you have a partner have them send the link to their video to the person in charge.

1. The video must be on YouTube, set to unlisted.

2. Be sure to set your video to unlisted so that only the person with the link can view it.

3. We expect it will be viewed by 3 judges and possibly a Tri County volunteer if needed.

4. We have asked the judges to respect the judging process and view your video privately, although we have no control over this.

5. While you are home and likely in casual mode if you decide to be in your video we suggest that you have a professional look.

6. You do not have to appear in your video, you can narrate it from afar.
