

STAY SAFE REQUIRED!

- Please follow your school's COVID-19 plan. Much can be done online via emails, Skype. texting and If all on the team have One Drive this is another option. We do expect that it is your children's work, the team's work and doesn't include others not associated with the project. Parents are permitted to type answers.
- 2. Your child should create a poster board using Free PowerPoint Templates for Posters Science Fair. While we are not advertising this site this is one of the places we found. <u>http://posters4research.com/templates.php</u>. You should choose a poster board with 3 columns 36 x 48. You will be required to turn your Poster Board into a **PDF**. You may also upload it in the original format. If choosing the latter then BOTH the pdf and original format need to be uploaded.
- 3. FREE Video Editing Sources: VSDC (Windows) iMovie (Mac) have been recommended to us although we have never used them.
- **4.** If you are a solo project (just you) the video should be 3-4 minutes however if the experiment takes a little longer to achieve you may have enough time sufficient to show the experiment in its's entirety.
- 5. If you are a team and unable to merge videos together made separately, please note there is an area for up to three team member videos to be placed on the entry form. Each team member should pick an aspect of the project to address. You may each do a 2 minute video.

ONLINE ENTRY FORM

While all parents on a team project will receive the entry form please select one person to be in charge of getting it back to us. The person "in charge" or email entered on "Email of adult filling out the form" line will receive a written confirmation and be able to view what we see. Please forward that confirmation to parents of the other team members.

WRITTEN RESPONSES

- 1. Your children should be able to collaborate with partner(s) on this. The answers will go on the "K-4 School Video Registration Form"
- 2. <u>All answers are final once you hit send</u> so we suggest that you write your answers in word or other reviewable format and then cut and paste your answers into the appropriate boxes.

VIDEO

TRI COUNTY SCIENCE & TECHNOLOGY FAIR

While all parents will receive the entry form please select one person to be in charge of getting it back to us. If it is a team please have partners send the link to their video to the person in charge.

- 1. The video must be on YouTube, set to Unlisted so only those with a link can view it. If your child created an experiment they need to demonstrate they can film it.
- 2. Be sure to set your video to Unlisted so that only the person with the link can view it.
- 3. We expect it will be viewed by 3 judges and possibly a Tri County volunteer if needed.
- 4. We have asked the judges to respect the judging process and view your video privately, although we have no control over this.
- 5. While children are home and likely in casual mode if you decide they should be in the video we suggest that they not wearing pjs.
- 6. Your child does not have to appear in your video, they can narrate it from afar.
- 7. If your child has received awards from a previous contest we ask that you crop out / do not include any awards.
- 8. If your child created an experiment they can recreate it in your home and film it.
